CAPE COD COLLABORATIVE

Cape Cod Collaborative was organized, as an extension of its 20 member districts, in 1975 when its member school committees agreed to associate pursuant with the authority contained in Chapter 40, Section 4E of the General Laws of Massachusetts. The purpose of this association, as amended on April 20, 1993, is to:

- ◆ Conduct joint educational programs and services that permit the associated school committees to supplement and strengthen school programs for regular education students and special education students.
- ◆ Provide therapy services and/or transportation services (special education and regular education) to programs operated by the Collaborative, member districts or out-of district placements.
- ◆ Provide vocational, prevocational, behavioral intervention, developmental skill training, enrichment programs, or educational programs to regular education students and special education students.
- ◆ Develop other service delivery models as identified by member districts. For example, Medicaid reimbursement, Cooperative Purchasing and professional development.

This agreement to associate is based upon the premise that some programs and services for regular education students and/or for special needs students can be accomplished more effectively and efficiently by the 20 member school districts cooperating together through the Cape Cod Collaborative.

Our Mission and Vision Statement

*The **Mission** of the Cape Cod Collaborative is to provide, as an interdependent collaboration of public school communities, a flexible, evolving range of high quality, cost-effective programs and services.*

Vision

To ensure its success, the Collaborative will establish and maintain communication, governance structures, and practices that regularly assess needs, provide collaborative solutions, and monitor effectiveness.
